Smart Utilities Platform

Critical infrastructure deserves the most advanced technology. The Smart Utilities Platform brings a much-needed 5G overhaul to crucial analog municipal equipment right under our feet.

Online Platform

Total control over devices in a few clicks. Here you can interact with data insights, reports, get alerts and manage maintenance windows.

Smart Radar

A self-contained device that uses a radar pulse to measure the level of water and other liquids without additional probes.

Smart Hydrant Cap

A 5G replacement for the standard fire hydrant end caps that do much more than keep water from leaking.

Critical Solutions

✓ Monitors hydrants remotely for undetected leaks

✓ Prevents rainwater from overflowing into sewage channels

✓ Detects the health status of mission-critical firefighting infrastructure

✓ Improves septic tank maintenance by remotely checking the waste level

✓ Sends automated reports on the overflow of catch basins due to heavy rain

Benefits & Advanteges

Detect tampering and unauthorized access

Anticipate flooding and rainwater contamination

Save time and money with better maintenance
