

CNG ENGINE for OpenSSL 3.0

Our engine allows OpenSSL applications to authenticate their TLS sessions with private keys stored in Microsoft Windows certificate stores.

Our Vision & Mission

Worksters, Inc. was founded in 2011 to provide superior technology and products to the U.S. government.

Worksters' competencies are centered in data collection and analytics, enterprise IT and software engineering.

We pride ourselves on excellent customer service, building lasting relationships, and bringing on talented team members and partners who are among the best in their fields.

Benefits & Advantages

→ **The use of modern Cryptography API: Next Generation interface instead of the obsolete CryptoAPI interface.***

*See

<https://docs.microsoft.com/en-us/windows/win32/seccng/cng-portal> for details.

→ **Support for retrieving OpenSSL's X509 objects from the engine.**

→ **Support for OpenSSL 3.0 FIPS 140-2 validation.**

→ **Support for negotiating modern versions of TLS protocol, including TLS 1.3.***

*The CNG engine is currently commercial software, i.e., not Open Source.
